Thoughtless Talk

Very Easy To Supply Valuable Information

A timely warning recently was broadcast in England by admiral of the fleet, the Earl of Jellicoe, who was, and is, based at Canadian naval headquarters by the controller of naval information.

"Most people," said Lord Corder, "do not realize the serious consequences that may arise from their thoughtless talk, and no doubt many of you think that the so-called 'water-tight' business is overdone. But really it is not, and I will try to show you what the result of gossip might very easily be."

"You remember how our three cruisers fought the Graf Spee? Well, had you not so roughly that the ship went into a neutral harbor from where it emerged only to scuttle herself. The Graf Spee probably would have done this if it had not been for the fact that these three cruisers were on that coast, but considered that if they could not defeat them, they would at least get away. But the result of their escape might have been there as well as within a few days."

"Suppose, therefore, that Mrs. Jones, the fond aunt of a youngster in the aircraft carrier, Air Royal, had not a friend in the street, and that she had not a friend in the neighborhood who had a nephew was getting on, and Mrs. Jones had answered that the boy was never more than 24 hours in port, and no South American woman ever worked overseas."

"Mrs. Jones' friend had a good story for her tea-party, and one of the guests told her friend in the house a few days later that the Air Royal had said that South American women wouldn't work overseas. An enemy agent overheard this on that reported it to Berlin, and the result was that the Air Royal would have gone to the Graf Spee with the result that the ship would not have been damaged by the enemy of the River Plate, and the ship would have been sunk, a lot more lives might have been saved, the rider had been killed, and all because of that thoughtless remark."

Oned Misallure Library

James D. Henderson, 55, owner of one of the largest collections of miniature books in the world, died recently at Houston. Henderson owned more than 2,000 volumes of miniature books, among them the smallest ever known. Catholic prayer book in miniature.

Temperature Of Humans

Pathfinder says even in cold weather, human beings are as warm as ever. The reason is that the human body is a perfect thermostat. It varies somewhat from day to day, but the normal temperature is 98.6 degrees Fahrenheit.

British chemists are improving

gray-proof paints, which must not be washed off by rain. They are now being used in the construction of bridges and other structures.

Lead poisoning caused by swine

Scientific laboratories use a common poison among wild ducks. It is lead poisoning, which is caused by the lead in the shot.

LOOK OUT FOR YOUR LIVER

It may be the cause of your troubles. It is the most important organ in the body. It is the liver that filters the blood and removes the poisons. It is the liver that keeps the body healthy.
